

# EXECUTIVE TRAINING: **Reliability Workshop**

Join **ECI** and **Spartakus Technologies** for our Executive Training: **Reliability Workshop**.

This one-day executive training session is designed for industrial plant managers and executives who are actively looking to enhance the reliability of their facilities, leading to improved uptime, quality and throughput. This training provides a well-rounded approach, combining theoretical knowledge, practical real-world examples, and self-assessments to deliver a comprehensive learning experience.

One-on-one discussions follow the session to review individual use cases and identify the top three opportunities to improve reliability and operational performance.

## TOPICS

- Reliability in Dollars and Sense
- Labor Challenges
- Identification of Potential Losses
- A Culture of Reliability
- What Great Looks Like
- The Maintenance Organization
- Key Performance Indicators
- The Roadmap to a Reliable Plant
- Design for Reliability & Failure Elimination
- Asset Master Data & Strategy
- Total Productive Maintenance
- Asset Health & Digital Transformation
- Leadership for Reliability
